

FAITH MEDICAL GROUP — DISEASE CODEX

Aureline Edition, Volume I

PREFACE

This volume serves as a rapid-reference guide for clinicians, archivists, and authorized field medics. Each disease is presented in standardized codex format for clarity, consistency, and accelerated triage.

1. FROSTLUNG SYNDROME (FLS)

Codex Classification: CRYO-RESPIRATORY DISORDER

KNOWN ORIGINS

- Exposure to cryothermal winds
- Aura-core cooling below safe threshold (72° Aural)

AFFECTED REGIONS

- Fross Continent
- High-altitude settlements

SYMPTOM PROFILE

Primary Symptoms	Secondary Indicators	Severe Manifestations
Cold chest pain	Crystallized breath	Internal frost cracks
Blue lips	Aura dimming	Lung-ice calcification

DIAGNOSTIC PROTOCOL

1. Bioluminal Respiratory Scan (BRS) – Identify particulate ice shadows.
2. Aural Temperature Check – Readings below 72° indicate emergency status.
3. Internal Lesion Mapping – Determine frost crack depth.

TREATMENT DIRECTIVE

Procedure	Duration	Notes
Warm-Essence Inhalation	2 hours	Repeat until stable
Phase-Sutures	Variable	Close internal frost fractures
Vital Echo Monitoring	48 hrs	Required for all cases

2. SUNSPIRE BURN FEVER (SBF)

Codex Classification: PYRO–SYSTEMIC FEVER

KNOWN ORIGINS

- Overloaded fire-aura
- Rapid systemic dehydration

AFFECTED REGIONS

- Lumia
- Kaji Summer Belt

SYMPTOM PROFILE

Primary Symptoms	Secondary Indicators	Severe Manifestations
High fever	Metallic taste	Aura flare bursts
Red-glow eyes	Heat discharge	Organ overheat shock

DIAGNOSTIC PROTOCOL

1. Hydration Scan – Levels <30%.
2. Thermal Aura Mapping – Observe red overproduction.
3. Blood-Heat Index – Evaluate flare risk.

TREATMENT DIRECTIVE

Procedure	Duration	Notes
Cooling Crystal Packs	1 hr	Replace when dim
Flame-Reduction Draught	2 doses	Rapid aura neutralization
Relapse Monitoring	24 hrs	Watch for secondary flares

3. VEILWILT (VW)

Codex Classification: AURA-DEPLETION DISORDER

KNOWN ORIGINS

- Emotional suppression
- Aura thinning due to chronic stress

AFFECTED REGIONS

- Orynvell Aureline

- Densely populated work sectors

SYMPTOM PROFILE

Primary Symptoms	Secondary Indicators	Severe Manifestations
Aura greying	Emotional dullness	Aura collapse
Exhaustion	Memory fog	Loss of vital oscillation

DIAGNOSTIC PROTOCOL

1. ESS Scan – Emotional waveform suppression.
2. Aura Density Reading (ADR) – Low-field measurements.
3. Memory Sync Test – Fragmentation indicates progression.

TREATMENT DIRECTIVE

Procedure	Duration	Notes
Aether Cradle Session	6 hrs	Restores emotional coherence
Memory Stabilization	Guided	May require multiple sessions
Rest Prescription	3–5 days	Mandatory low-stress period

THERMAL AURA DIAGNOSTIC REPORT

Patient ID: 47B-Kaji Scan Type: Thermal Aura Test
Technician: L-4 Medic Aureline COMPLETE

1. AURA TEMPERATURE INDEX

Core Temperature	118.4° Aural (Elevated)
Mid-Layer Temperature	93.2° Aural (Moderate)
Surface Temperature	82.7° Aural (Normal)
Stability Rating	Unsteady

2. HEAT DISTRIBUTION MAP

Head/Face	Moderate
Chest/Core	High — critical zone detected
Arms/Hands	Slight overheat near fingertips
Lower Body	Stable, normal heat dispersion

Notes: Core heat spike not evenly circulating; stacking around stern-

3. FLARE SIGNATURE PATTERN

Pattern Type	Radiant Burst Pattern (RBP-2)
Frequency	Low (4 minor pulses per minute)
Velocity	Slow diffusion
Severity Level	Mild flare activity present

4. AURA FLOW CHANNELS

Flow Rate	71% of normal
Blockages	Minor heat blockage in right shoulder
Circulation Path	Redirecting heat upward
Core Pulse Strength	132% of baseline
Interpretation	Core is burning hotter than necessary — consistent with SBF

4. RIFTSPINE FRACTURE (RSF)

Codex Classification: TEMPORAL-STRUCTURAL INJURY

KNOWN ORIGINS

- Time-slip accidents
- Gravitational instability zones

AFFECTED REGIONS

- Rift Valleys
- Temporal Fault Borders

SYMPTOM PROFILE

Primary Symptoms	Secondary Indicators	Severe Manifestations
Spinal pain	Perception lag	Timeline shear risk
Glow-fracture marks	Reflex delay	Temporal drift episodes

DIAGNOSTIC PROTOCOL

- 1. Temporal Body Scan – Identify phasing irregularities.
- 2. Spinal Vibrational Mapping – Glow-fracture visibility.
- 3. Reflex Wave Testing – Delayed signals indicate severity.

TREATMENT DIRECTIVE

Procedure	Duration	Notes
Phase-Suture Installation	Variable	Aligns fractured timelines
Timefield Therapy	2 sessions	Stabilizes perception
Mobility Restriction	2 weeks	Prevents further timeline drift

END OF VOLUME I
