3. CORE HEALING PRINCIPLES

3.1 The Three Aspects of Self

Understanding the Triad is essential for all diagnoses.

Aspect	Description
Physical Form	Biological body, organs, skeletal structure.
Cognitive Flame	Memory, neural energy, emotional regulation.
Spirit Thread	Resonance signature, metaphysical stability.

3.2 Resonance Instability Signs

Healers must be vigilant for the following symptoms:

- Aura flickering or dimming
- Echoing or delayed speech patterns
- Pulse-light fluctuations
- Emotional flooding (sudden, context-less weeping or rage)

4. FACILITY STANDARDS

4.1 Required Equipment List

Device	Purpose
RBU-4 Bed	Synchronizes patient frequency; auto-adjusts environment.
NeuroGlass Panel	Internal projection + memory mapping interface.
Bioflux Monitor	Real-time nanite count + vitality tracking.
Frequency Shield	PPE for protection against resonance contamination.

4.2 Contamination Protocols

IMPORTANT: These protocols must be posted at every ward entrance.

1. **Mandatory Shielding:** Wear a Frequency Shield when treating unstable patients.
2. **Violet Purge:** Perform Violet Purge Sweeps immediately after contamination events.
3. **Sanitization:** Remove all metallic instruments during purges to prevent magnetization.

7. TREATMENT PROTOCOLS

7.1 Resonance Recalibration (RR)

Indication: Instability symptoms, aura distortion.

Procedure:

1. Position the patient on the **RBU-4 bed**.
2. Initiate frequency sync (match Hertz output to patient's baseline).
3. Monitor **Cognitive Flame** for dream disturbances.
4. Stabilize until aura is static.
